

Top 3 News Items

1. The project team is continuing with the workshops. Financial aid is the next functional area that will be configured. As mentioned previously, the workshops provide the technical answers for our team to then build out the system to best meet the needs specific to Acadia. Our partner Ellucian is quick to share proven practices that assist us in securing the best system possible
2. We have begun the arduous task of data migration that is necessary for the functionality of the new Student system. Ensuring "clean" data will be of the utmost importance for success with the new system.
3. Change management in the time of COVID is critical. Working or teaching from home can be challenging for all of us. Empathy with our fellow colleagues is important as we all strive to move forward.

Interested in how change management may be able to help?
