## Top 3 News Items

1. This week the project team will continue with our workshops. Ellucian will be running a week long workshop on registration design. Several stakeholders will discuss the needs in this area to ensure that the design provides high value.
2. One of the opportunities that we have with this change is that we are able to review most processes that currently exist here at Acadia. As a result we will utilize the new software to help us streamline and improve some of our processes.
3. Have a problem to solve? Try 3 questions to use adaptive action. It is the process of asking these 3 simple questions to attempt to deal with difficult situations: What- problem identification, so what- implications and now what- actions. It is an iterative process of using the information at hand to try to move forward with solutions.

“Simple can be harder than complex: You have to work hard to get your thinking clean to make it simple. But it’s worth it in the end because once you get there, you can move mountains.” — Steve Jobs

### Videos from the Project Team

Watch members of the project team share their thoughts about progress of the new student information system configuration.
